

CHILD PROCESSES

asynchronous process creation

Spawning... bat & .cmd on windows

Child-process . exec

- execFile
- fork
- spawn

options . detached

- stdio

synchronous process creation

child-process . execFileSync

- execSync
- spawnSync

class: ChildProcess

'close'
'disconnect'
'error'
'exit'
'message'

subprocess . channel

- ref
- unref

subprocess . connected

- disconnect
- exitCode
- kill

- killed
- pid
- ref
- send

example: sending a server object

example: sending a socket object

Subprocess, signal Code

- spawnArgs
- spawnfile
- stderr
- stdin
- stderr
- stdout
- unref

maxBuffer and unicode

shell requirements

default windows shell

advanced serialization
